# SURFACE SEAL

01

## Product(s)

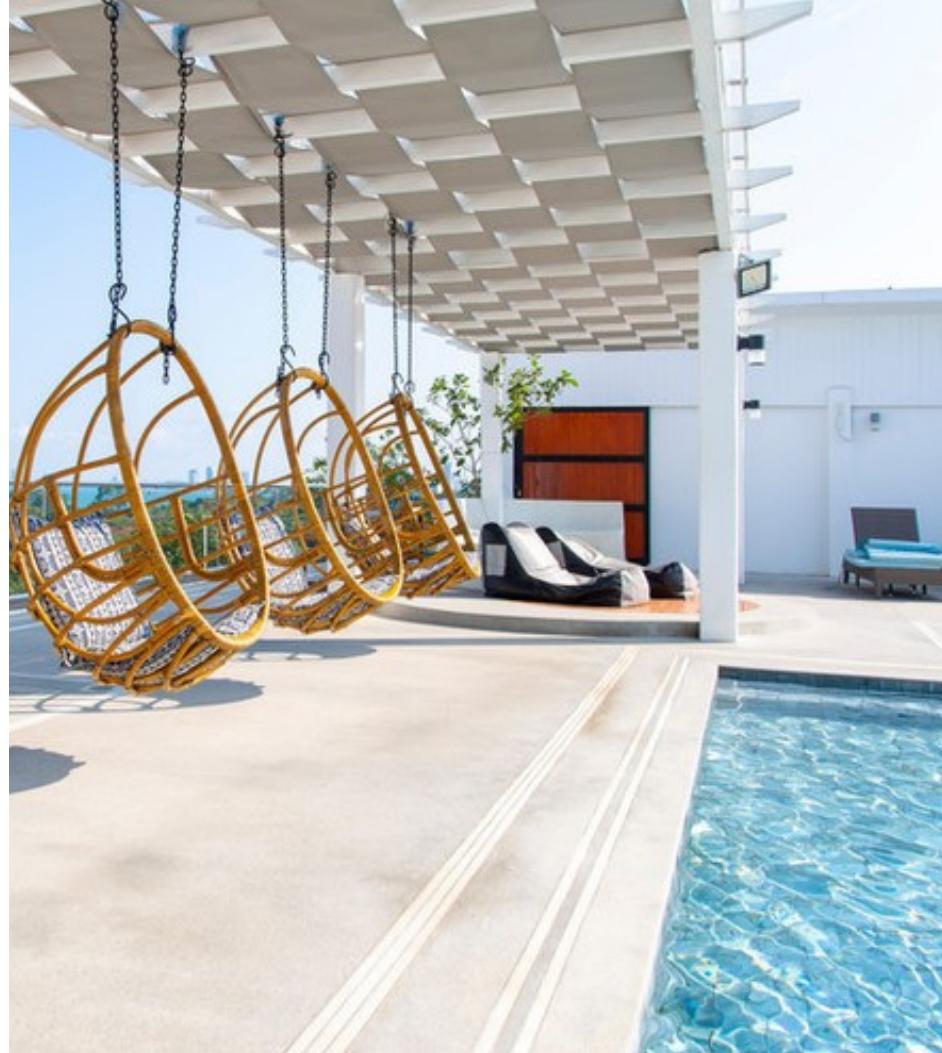

- Eco Seal

Protect and seal old or new concrete surfaces with 1 or 2 coats of Eco Seal.

- Great for sealing exterior or interior concrete after metal bond diamond grinding
- Excellent sealer for reviving old garage floors and driveways by increasing sheen levels
- Hardwearing for sealing shopping centres and factory floors
- Fast drying, re-coat within 30 minutes
- Non-yellowing and extremely weather resistant
- Ready to use from the container and easy to apply
- Easy to re-seal
- Virtually odourless and environmentally friendly

# NATURAL PENETRATING SEAL

02

## Product(s)

- Eco Seal Natural

Protect and seal old or new concrete surface with 1 or 2 coats of Eco Seal Natural

- Great for sealing exterior or interior concrete after metal bond diamond grinding
- Invisible penetrating sealer that will not change the natural appearance of floors
- Ideal for surfaces with a slip resistance requirement - will not change the slip rating
- Excellent for wet areas like swimming pool surrounds and bathroom floors
- Fast drying
- Non-yellowing
- Ready to use from the container and easy to apply
- Easy to re-seal
- Virtually odourless and environmentally friendly

## HARDEN AND SEAL

03

### Product(s)

- Eco Densi Shield Lithium
- Eco Seal or Eco Seal Natural

Harden and seal concrete floors with 1 application of Eco Densi Shield Lithium and 1 or 2 coats of Eco Seal or Eco Seal Natural

- Great for hardening and sealing garage floors and driveways
- Concrete dust prevention for factory and warehouse floors
- Resilience to forklift and vehicular traffic
- Prevention of staining in the concrete
- Fast drying
- Non-yellowing
- Ready to use from the container and easy to apply
- Virtually odourless and environmentally friendly

# FULL POLISH

## 04

### Product (s)

- Concrete Grinding Lube
- Eco Grout
- Eco Densi Shield Potassium or Sodium and Lithium
- 2K Super Seal
- Eco Polish

Grind concrete floors using Concrete Grinding Lube to improve grinding time and reduce diamond wear.

Remove pinholes, cracks and other imperfections with Eco Grout. Harden the surface with 1 application of Eco Densi Shield Potassium or sodium, then polish as desired. Harden with Eco Densi Shield Lithium after 400 grit resin. Seal the surface with 1 coat of 2K Super Seal.

For extra protection apply 2 coats of Eco Polish buffed onto the surface as a sacrificial protective coating.

- No curing time like conventional coatings
- No topical sealers to wear away and dull the floor
- No roller marks or dust embedded into the surface
- Highly scratch resistant
- No issues such as peeling, bubbling and discolouration
- Maintenance cost is significantly lower than coating systems

# DOMESTIC CLEAR

05

## Product(s)

- Eco Bond
- Carbon Coat (Gloss, Satin or Matte)

Seal the surface and increase adhesion with 1 coat of Eco Bond then protect the concrete with 2 build coats of Carbon Coat - Polycarbonate.

- Commercial durability for highly trafficked floors
- Glassy flat finish without roller or brush application marks
- Excellent impact, scratch and abrasion resistance
- Available in Gloss, Satin or Matte finish
- UV stable and non-yellowing
- Fast curing, reducing delays between re-coat times allowing jobs to be completed in 1 day
- Will not change the colour or appearance of the concrete
- Excellent for coating over epoxy and flake floors
- Ready to use from the container and easy to apply
- Virtually odourless and environmentally friendly

# COMMERCIAL CLEAR

06

## Product(s)

- Eco Bond
- Carbon Coat (Gloss, Satin, Matte)
- Diamond Link Hardener

Seal the surface and increase adhesion with 1 coat of Eco Bond then protect the concrete with 2 build coats of Carbon Coat - polycarbonate with the addition of Diamond Link Hardener (2-pack additive).

- Commercial durability for highly trafficked floors
- Glassy flat finish without roller or brush application marks
- Excellent impact, scratch and abrasion resistance
- Available in matte, satin or gloss finish
- UV stable and non-yellowing
- Fast curing, deducing delays between re-coat times allowing jobs to be completed in 1 day
- Will not change the colour or appearance of the concrete
- Excellent for coating over epoxy or flake floors
- Ready to use from the container and easy to apply
- Virtually odourless and environmentally friendly

# INDUSTRIAL COLOUR OR CLEAR OPTION 1

07

## Product (s)

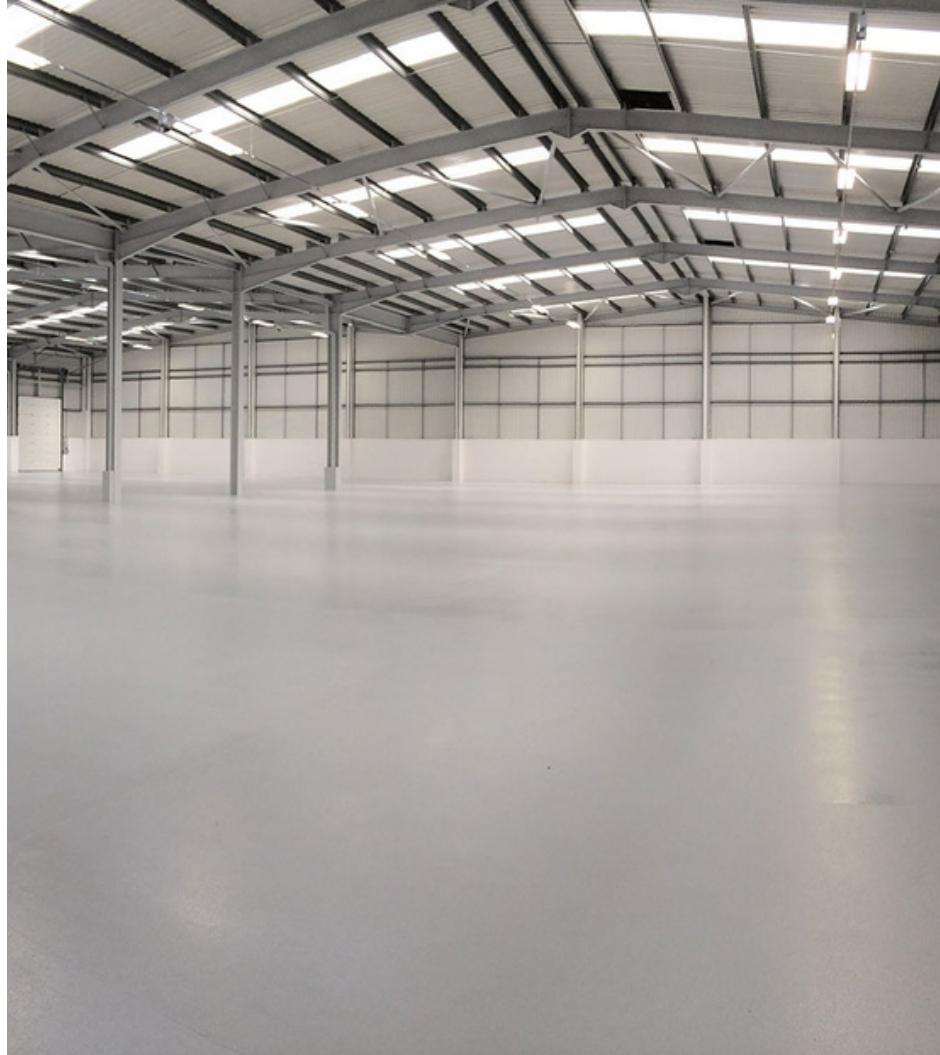

- Eco Bond
- Eco Epoxy Shield

Seal the surface and increase adhesion with 1 coat of Eco Bond then protect the concrete with 1 high build coat of 100% solids 2-pack, Eco Epoxy Shield.

- Self priming
- 100% solids for a very high build
- Good chemical resistance
- Good impact and scratch resistance
- High gloss sheen level
- Will not change the colour or appearance of the concrete
- Excellent for flake and metallic pearlescent floors

# INDUSTRIAL COLOUR OR CLEAR OPTION 2

08

Product (s)

- Eco Epoxy Shield

Apply 2 high build coats of 100% solids 2-pack, Eco Epoxy Shield.

- Self priming
- 100% solids for a very high build
- Good chemical resistance
- Good impact and scratch resistance
- High gloss sheen level
- Deepens the appearance of concrete, enhancing the colours
- Excellent for flake and metallic pearlescent floors

# INDUSTRIAL COLOUR OR CLEAR OPTION 3

09

## Product (s)

- Eco Bond
- Eco Sparta Shield

Seal the surface and increase adhesion with 1 coat of Eco Bond then protect the concrete with a high build coat of Eco Sparta Coat - 100% Polyaspartic.

- Primer coat for extra adhesion and reduced slab gassing
- 100% solids for a very high build
- Fast cure, ready for next day back in service
- Excellent chemical resistance
- Excellent impact and scratch resistance
- High gloss sheen level
- Will not change the colour or appearance of the concrete
- UV stable and non-yellowing.

# INDUSTRIAL COLOUR OR CLEAR OPTION 4

## Product (s)

- Eco Sparta Shield

Protect the concrete with 2 high build coats of Eco Sparta Shield - 100% Polyaspartic.

- Highest quality coating system available for the toughest conditions
- Suitable for all industrial applications
- 100% solids for an extremely high build
- Fast cure, ready for next day back in service
- Excellent chemical resistance
- Excellent impact and scratch resistance
- Super high gloss sheen level
- UV stable and non-yellowing

# INDUSTRIAL COLOUR OR CLEAR OPTION 5

11

## Product (s)

- Eco Epoxy Shield
- Eco Sparta Shield

Protect the concrete with 1 high build coat of Eco Epoxy Shield and 1 high build wear resistant coat of Eco Sparta Shield.

- Highest quality coating system available for the toughest conditions
- Suitable for all industrial applications
- 100% solids for an extremely high build
- Fast cure, ready for next day back in service
- Excellent chemical resistance
- Excellent impact and scratch resistance
- Super high gloss sheen level
- UV stable and non-yellowing

# TEXTURE FINISH

12

## Product (s)

- Eco Bond
- Eco Sports Shield

Seal concrete or asphalt and increase adhesion with 1 coat of Eco Bond then decorate the surface with 2 coats of coloured or clear Eco Sports Shield.

- Excellent for exterior or interior multi-sport applications
- Excellent for pedestrian walkways and entertaining areas
- Available in standard or custom colours
- UV stable and non-yellowing maintaining bright colours for years
- Fast curing reducing delays between re-coat times allowing jobs to be completed in 1 day
- Ready to use from the container and easy to apply
- Easy to re-coat and change colour or design
- Virtually odourless and environmentally friendly
